HP Support to Reap the Digital Print Market by [Jack K Wilson](#)

Article published on January 30th 2012 | [Software](#)

For the current FESPA Digital 2012 event scheduled in February from 21 to 24, HP is known to be revealing its special printer product lines, prominently Designjet L28500 and HP Designjet L26500 Printers based on HP Latex Inks that are believed to bear the caliber of producing broader range of indoor and outdoor signage. The former outweighs the latter in terms of performance and is approximately 70 times faster. When it comes to quality there is no compromise as both can deliver rich blacks and glossy results on banners and self-adhesive vinyl, and offer double-sided printing proficiencies with the least effort and minimal cost.

The result is more accurate with automated registration. You can discover new applications that are versatile and cost-effective to match growing business. For industrial press the event brings a range of solution including the HP Scitex FB7600 Industrial Press, the HP Scitex TJ8600 Industrial Press and HP Scitex XP series printers.

Thus, HP is all set to flex its muscles with the contenders like Dell, Lexmark, Epson and others. The end result, however, is far away and prediction will be a mock. But HP Customer Support is geared up for comprehensive technical support for each and every commencing product. Third-party service providers are much keen to assimilate the service to give innovative experience to new comers and captivate the old ones. Their experts will setup, install, configure and network the printer besides providing real-time troubleshooting service to fix any printer related issues. Powered with the industries'™ best remote technology these service providers will make sure that you don't™t lose th momentum in the competitive world, it can come to your rescue wherever you are.

At HP technical help-desk you are welcomed by a special domain as printer support administered by experienced subject-matter-experts who can provide on-demand service as per your demand. The dais is also sensitive about the future prospect of printing, and every interaction that you have had are kept in the database, so that next time you don't™t have to disclose much about the specification of your printer. Moreover, the service is guaranteed with a service-level-agreement ticket assuring that your problems are not yours alone, and if any of the addressed problems incur meanwhile that period it will be sorted out without any charge.

If you are a bit tech savvy you will find the HP Technical Support portal of much help. You can follow the self-repair and maintenance and video tutorial sections to detect and fix problem with your printer on your own without intervention of technicians. You may download printer software, firmware, and other software update if you are interested in resolving software conflicts.

You can imagine a whole generation of technicians sitting at the HP repair center. No doubt how old your printer machine is or even the operating system running on your system is too old, experts will never let you down. This is a good thing for old and contemporary, novice and tech savvy, and small and big business, you are no more just a spectator but a real player, and can shake hands with HP technicians over the phone anytime.
