Mac DivX to iPod Converter You Should Own by Vivianusgong

Article published on March 29th 2012 | Software

As you know, many video files like DivX, MPEG video can't be played on your iPod. Now you can easily convert DivX to iPod for Mac, and transfer all popular video formats to iPod, once you own iPod Movie Converter for Mac.

The powerful Mac DivX to iPod converter not only can convert DivX to iPod, but also other video formats to iPod such as MP4, MOV, FLV, AVI, VOB, 3GP, 3G2, MKV, WMV, M4V, MPG(MPEG), TS, TRP, MTS, M2TS, TP, DAT, MOD, ASF and so on. What is more, it enables you to extract audio from all popular audio formats to M4A, AAC, etc. for your iPod.

You have the freedom to clip just a segment, or tweak the output video and audio parameters. With it, you can even customize video effects at will including video brightness, contrast and saturation under Mac OS x. Convert files in high speed while still maintaining the audio and video quality.

The basic guide will show you how to convert DivX to iPod for Mac step by step:

* Step 1: Free download Mac DivX to iPod converter from Hodosoft, install it on your Mac computer and launch it.

* Step 2: Click "Add Files" button to load DivX files you want to convert. This Mac iPod video converter supports batch conversion, so that you can convert several videos to iPod on Mac Book conveniently.

* Step 3: Click "Browse" button to specify a directory folder on your computer to save the output files.

* Step 4: Under "Profile" button to choose your iPod device and required video format, like iPod Video MPEG-4, iPod H.264.

This software supports iPod touch, iPod classic, iPod nano, and iPod shuffle. Plus, it also supports conversion for iPhone, Apple TV and PSP, so you can select a proper output format according to the name of your device conveniently in default output format list.

* Step 5: Click "Convert" button to convert DivX to iPod for Mac OS.

Tip 1: This smart program allows you to shut down your computer automatically after conversion if you don't want to wait around during the conversion.

Tip 2: If you want to merge all added video files to iPod into one output file, you can check the "Merge into one file" option.

Now it is possible to put videos and audios in any format into your iPod with iPod Movie Converter for Mac! User-friendly interface and fast conversion speed of the Mac DivX to iPod converter make the whole conversion much easier and faster.

More about DivX format:

DivX is a brand name of products created by DivX, Inc., including the DivX Codec which has become popular due to its ability to compress lengthy video segments into small sizes while maintaining relatively high visual quality. The DivX codec uses lossless MPEG-4 compression,

where quality is balanced against file size for utility.
