Pros and Cons of Using Kaspersky Antivirus 2012 by Paul Smith

Article published on June 5th 2012 | Software

Much to the imagination a Russian company which was founded in the year 1997 became a world known company in term of computer security products (home and business pc) in no time. In fact it would not be wrong to say that, this company which we known by the name of â€˜Kasperskyâ€™ is one of the most demanded company for computer safety product in todayâ€™s time.

If you are thinking that the above statement of mine is a result of my personal liking toward this antivirus system then you are quite wrong, as its not only me who likes this product very much rather this is a software which is recommended worldwide by experts. And this can be supported with the examples of various milestones it has created on its way, for example this company was included in software Top 100s 2009 edition as one of the best software companies in world. And now with its new product named as Kaspersky Antivirus 2012 this company is all set to achieve new targets.

Unlike many other softwareâ€™s, which are available in market this software is capable of working in both windows as well as Macintosh operating system, and there is no doubt that it works well with effective results.

Now stating with some of the best point which can be listed as advantages while talking about this product, Kaspersky Antivirus 2012 is capable of detecting new threats at the rate of 100% efficacy and this has been proved by AV â€“Test result.

Moving on to the second this antivirus system protects your computer from threats including viruses, Trojans, rootkits, key loggers, worms, spyware, , hackers, phishing attacks and more, also it comes with the features and tools which can be normally found in more advanced security system.

The best part which this Kaspersky Antivirus 2012 holds to itself is that it comes with a virtual keyboard which will help you from preventing your personal information from various hackers and key loggers.

Now talking about some disadvantages (donâ€™t worry there are not much of them).

To start with there are many users and experts in the market who thinks that this product from the company is overrated or we can say it comes in high prices as compare to others in market. But as we say â€œif you are asking for best quality than you have to definitely pay something for itâ€• therefore I believe that this product is rightly priced.

Also at present there are number of online shopping websites in India, which will not only helps in getting best details of product but also help in getting new Kaspersky antivirus 2011 1 user in our budget price.
