Strategic use Time and Attendance by [Albert Stephen](#)

Article published on June 11th 2012 | [Software](#)

time and attendance system can improve your workforce's efficiency, save you time, reduce overall labour costs and greatly enhance your management analysis and reporting ability. Configured to reflect to your business structure and working rules, ime and attendance system is extremely flexible. Currently over 500 separate businesses use time and attendance tracking system in the UK with over 2 million people clocking in and out each day. Time & Attendance also manages activity tracking, costs centre analysis, job / project costing, so that from one business system you can manage all the time and attendance record types you require. For remote staff Isys offers affordable self servicing software enabling employees to clock in using a web interface on a remote pc. Or for mobile employees Isys can provide a Telephone Clocking solution for employees with access to a phone - allowing you to accurately track attendance even with employees that work away from base. In addition Isys also provides wireless handheld terminals and GPRS data terminals available for company's managing large sites with little or no network. Utilising the flexible workflow and business logic in ime and attendance systems enables you free yourself and other managers of mundane repetitive data entry (and its inaccuracies) and free up your valuable staff to focus on the proactive and profitable tasks their skill set is targeted at. We develop our Intelligent systems in-house, with over 30 years collective experience in Time and Attendance Systems, Access Control, HR and Job Costing. Work Place Time & Attendance software provides a world-leading comprehensive, scalable and flexible solution to Time & Attendance systems that can operate either as a stand alone system or part of a fully integrated suite of Workforce Management which seamlessly interacts with the Work Place Scheduling Software Module and Task and Work Management. Work Place Time & Attendance is frequently interfaced to other key corporate systems including HR, Payroll and Financials to be an integral element of the corporate systems strategy and execution.

Strategic use of Time and Attendance

Time and Attendance Key Benefits

Time and Attendance Key Features

Work Place is a fully integrated, web based suite of functionally rich, scaleable and highly flexible software modules for Workforce Management across a wide range of industry sectors. Time & Attendance software is at the core of a best practice Workforce Management System. It is used for the accurate management and tracking of staff attended hours against a planned schedule, roster of activity or daily and weekly contract hours, ensuring that staff are accurately measured and paid correctly. Using highly flexible and sophisticated rules based engine, Work Place Time & Attendance can accurately handle complex pay and work rules from large groups down to a single employee in single or multiple sites, in one or many countries. This ensures each individual is treated fairly and within their agreed contract of employment, such as the way breaks are allowed and paid and time rounding rules. Employee Time Tracking in the office or field. Simplify payroll & invoicing. Track projects, vacation, overtime, schedules and more. Web based time tracker is simple, easy to use, open source, web-based time tracking system. Time tracker allows you to track the time that employees, colleagues, or teammates spend working on any project or activity that you need to keep tabs on, and is suitable for teams and companies both large and small with any number of users.
