UB 04 software – the Most Reliable Medical Billing Solution [James Blee](#)

Article published on May 15th 2012 | [Software](#)

If you are a medical professional and wish to submit claims then you no longer need to hire medical billers for submitting your claims. When it comes to dealing with insurance companies, the claim process turns out to be time consuming and a big headache but with ub 04 software you can handle all the claims electronically in a much easier way. This software speeds up your process and allows you to choose templates based on your needs. You do not require any calculator as the electronic forms within the software are capable of automating the addition so that your totals are always accurate and exact.

This is the most simplest and powerful insurance claim form software available. Easy to use, you can view it on your screen and fill in the blanks as per the instructions being provided by the software. In order to send the form electronically, you just need to hit the print button and everything else would automatically be done by this software. This software can also be customised based on your practise and whenever new claims start, the practise data automatically gets filled in the form. With every claim your information is saved for re-use. All the claims are saved in the “claim list”™ allowing you to keep a track of everything.

A fast and reliable solution, this software provided you full money back guarantee and is paper and electronic claim compatible. You can also create unique shortcuts to make this software work better for you. Integrated with tools like calendar and database of patients, providers, insurance companies and diagnosis code, this software helps you in filling the form accurately and quickly. This software ideal for use by medical billers who need to bill Medicare and Institutional Medicaid, Blue Cross, Blue Shield, Private Insurance, Home Health and nursing agency billing.

Compatible with Windows interface that integrates appointment scheduling, patient demographics, claims processing, patient billing, complete patient accounting and financial reporting, this software provides you with a new horizon for medical claim processing. There are various electronic billing software available in market today. But you need to choose the right one depending on your requirements and use.
