What a Mac Keylogger Can Do for You by Branda White

Article published on July 10th 2012 | Software

There are many cases where a child, spouse or employee will improperly use your Mac computer. If you suspect that something is going on, then a Mac Keylogger is ideal for you. With it you can see all the activities without the user even knowing it. You will be able to see what your child, spouse or employee is doing online clearly in time. But also the keylogger records activity and delivers it to your account so you can view reports of all activity such as screenshots, keystrokes, websites, programs used and more.

Now, let us take a serious look at what a Mac Keylogger can do for us on earth?

Safeguard your young children from online dangers.

Eager to know exactly what your children or teenagers are doing on your Mac? Willing to make sure they are not visiting inappropriate websites or chatting with child predators? Now you can rest at ease and feel secure about their computer usage. You will see everything they do on Safari, Facebook, and other sites in time. With the Mac Keylogger you can view logs that show all of their chats, keystrokes, websites and more with screenshots. Therefore, Mac Keylogger will help you to monitor and guide our children. Only when you know how your children use the computer, can you take appropriate measures to prevent some disastrous result from happening in advance.

Catch your unfaithful cheating spouse on the Internet.

Most dating websites and chat-rooms are set up not only for making friends, but also for love affairs. In such a way, your husband, wife, boyfriend or girlfriend can cheat on you. Of course trust is one of the most important things for good relationships, but if your second half often visits dating websites and chat-rooms, you'd better verify whether he or she is cheating on you. Certainly the spouse may deny that he or she is cheating on you, but you ever will know the truth. It is because you can catch cheating spouse red handed with Mac Keylogger. Mac Keylogger will collect and save all the evidendce for you. It will be your private detective 24 hours a day and will easily catch cheating spouses for you.

Monitor and supervise your employees on office laptop.

Are you anxious to know what your employees are doing online? Are they working or playing? Maybe they are chatting online or browsing the non-work related websites? Ever dreamed of a software tool to monitor your employee's online offline computer activity in work? Thanks to the Mac Keylogger, you can know immediately when your employees are stealing time by visiting websites on company time. Mac Keylogger will not only examine the working status but also the working efficiency of your employees. You can make it clear now whether they are focusing their attention on the work every day or not with this Mac Keylogger.

Using the Mac Keylogger, you can protect your children from potential threat online, clear your suspicions to guarantee your spouse's loyalty to you, and supervise and control your employees' working state timely. The Mac Keylogger records all of the user's keystrokes so that you can find out which websites are visited and read all the conversations taking place over instant messages, emails or Internet chat rooms as well. With the help of Mac Keylogger, we can make everything under our control.
