Kripaluji Maharaj teaches devotion by Torres Jare

Article published on January 12th 2012 | Spirituality

The path to devotion is free from all worldly attachments. It brings us towards the supreme soul that runs the world. This supreme soul is the power and inspiration behind every activity taking place in the universe. This power is responsible for life, this power is responsible for death, this power is something that we can never experience, it is something that we always experience. We exist because we are a part of this power and we cease to exist as we dissolve in this power. This power gives us breath, this power causes our hearts to beat and this power makes the blood flow in our veins. It gives us sense, it gives us energy and it gives us the power to think and analyze. We come from this power and we are bound to this power. We all, all are a part of this power, we originate from it and one day we will be dissolved in to it.

We all are working towards the divine reunion with the power that is the ultimate beginning of the world and the ultimate end of the world. Complete devotion is the best path that bridges the gap between human soul and the eternal truth. We all can realize the truth of life through pure devotion. Kripaluji Maharaj teaches us the dedication and devotion for the betterment of our soul. He preaches us to have complete faith in the existence of that supreme soul that gives rise to the continuous flow of pure love for all human beings.

Kripaluji Maharaj has initiated many social service works to alleviate the pains of poor and needy people and taught us the real meaning of compassion and brotherhood. He encourages all to have sympathy for all living beings and asks us to contribute towards the betterment of our society through our selfless service.

Kripaluji Maharaj makes the journey towards the attainment of pure wisdom easier for all human beings and his teachings give all the knowledge and wisdom that takes them towards the higher grounds of self realization.

Kripaluji Maharaj never propounded any specific theory but he took the good things from all the ancient religious faiths and beliefs and encouraged the human beings to follow these good teachings from heart. He is the incarnation of pure love and compassion and imparts us the moral values that encourage us to go towards the ultimate goal of life ceaselessly without any confusion.
