Electric typewriters- enhancing typing speed by [James Blee](#)

Article published on February 21st 2012 | [Technology](#)

The rise in paper work in offices especially business related to printing or publishing and advertising, typing work is endless. If you are using manual typewriters then efficiency may be an issue as the chances of error are more and you may not type at very fast speed. If you want to buy a typewriter for your office then a wheel writer typewriter, IBM Wheel writer and Lexmark Typewriter are good options available in the market. If you want to choose from electric typewriters then IBM Wheel writer one thousand, which is a digital office grade typewriter, manufactured by Lexmark can be a good option.

The Lexmark wheelwriter 1000 typewriter is a combination of the prime quality performance and efficiency. This wheelwriter typewriter is a perfect choice for classrooms as it is powerful and equipped to withstand any typing challenges; for any organisation and home for personal typing work. Ribbon replacement is easily available in the market as many suppliers are providing the best services which are recognized by the company itself. In present scenario use of electric typewriters are more than manual typewriters.

One who wants to replace their manual typewriters with electric typewriters can have the best option by using internet as many prefer online shopping. Second hand typewriters are also available in the market with great ease and at cheap rate so that if you have less budget you can buy second hand equipment according to your requirement. While making the selection one should consider the brand reliability also otherwise after sale service may be a matter of concern for you. By choosing a branded typewriter, you can secure your money and feel tension free. Many people have the unique hobby of collecting the traditional typewriters. For getting the old typewriters they can contact shops who sell second hand typewriters.
