Gas lamps and gas lanterns to enhance the decoration of your home by [James Blee](#)

Article published on March 1st 2012 | [Technology](#)

The best way to enhance your home's or building's exterior is by having gas lamps and gas lanterns which provide a functional source of light. You can find many designs and styles of gas lanterns that are powered by propane, electricity, gas, and can be displayed in numerous ways.

Styles of gas lamps:

**Wall Mounted:** You can have lanterns and gas lamps that can be easily mounted directly on the exterior of the wall by using a bracket mount for lighting the area that is closest to the office or home.

**Stand Alone:** There are various types and styles of lanterns available in the market that can be mounted on a column or post and can be positioned according to your requirement.

**Having a bracket:** You can easily find elaborate brackets which could be used for hanging the lanterns onto the walls. It simply can be used as a decorative piece that is ideal for parties and areas for gathering like the deck or patio.

**Hanging:** You can also suspend the gas lanterns over the entryway of the door and use it as a unique alternative for the electric light fixtures.

Style that is best suited for your needs

With so many options easily available, you might be uncertain as to which style of gas lamps to use in the exterior of your home. Depending on your taste, requirements and the design of your house or building, you can buy lamps or lanterns that might suit your place and would be ideal to enhance the beauty of your home. It can be on brackets, be put on the entryways, and be placed on walkways or driveways, put indoors or at any part of your house. Whatever is your choice and wherever, you place it, you are sure to get good comments from your guests and onlookers
