Why Choose Sennheiser HD 25? by Carina Coronel

Article published on December 5th 2011 | Technology

Well known brand in professional audio and recording field, the Sennheiser HD 25 is yet the best sealed headphone in the market today. This headphone guarantees to deliver engaging full tone and solid sound isolation. This ear model comes in a unique design like a headband that works best for users who are active. The piece can also split to make a brim behind and in front of the head to make it more stable and comfortable for the user. The swiveling movement of the ear cushions that can be turned for mixing music using one ear is perfect for music producers or DJs alike. The quality of music that comes out from Sennheiser HD 25 is certainly the best for its kind.

The newest update on the design of the Sennheiser HD 25 still remains to be professional looking and this sealed â€œon-earâ€• model offers the best sound quality with a versatility of a headband. The unique design of this headphone makes it the top choice for users who are looking for headphones that are durable and flexible enough to withstand the demanding chores during high level performances and gigs.

The Sennheiser HD 25 is not only meant to be used by professional music artists, itâ€™s also designed to be enjoyed even by normal persons and music fans. Everyone who wants to listen to great music from beatmakers, studio session soundman, DJs, music producers to gym rats, airline travelers, average commuters or someone at home can indulge themselves with listening to their favorite track with high precision detail using the Sennheiser HD 25 where ever they may be. You can enjoy the clear sound that comes out from the Sennheiser HD 25-1 II with its evenly sounding mids, clearly defined lows and the finely enhanced highs. In the sealed/closed category headphones, the Sennheiser HD 25 is on the top of the list. The creative design of this headphone makes it perfect for use not only in indoor functions but this headphone is also tough enough to be used while doing some extreme outdoor fun.

Another great pro monitoring headphone that you can use is the closed back Sennheiser HD 25-1 II. This kind of headphone can give you high attenuation of noise from the background. This can also handle high levels of sound pressure. Its strong construction enables it to work well even in the noisiest environments like in studio monitoring, testing studio equipments and ENG. The cushions can also be turned if you want to listen just with one ear. This kind of headphone is best for DJs and cameramen. .

If you are looking for the perfect headphones for your jams or music sessions, then donâ€™t look any further, because the Sennheiser HD 25 is the one that can meet all your sound requirements. Its features are great and itâ€™s sold in very reasonable prices. This headphone also comes with a 2 year product warranty from its manufacturer.
