Now, when we plan to purchase a television, we mainly consider three categories of televisions named LED, LCD and Smart TV. Till recently Plasma TV was also taken as option. But the increasing popularity of LCD and LED TV sets, the popularity of Plasma televisions has got subsided. The present day market is mainly viewing the cut-throat competition between the LCD and LED television. People have started forgetting Plasma TV even. At this juncture, Panasonic has presented a new plasma television named Panasonic VIERA TH-P50ST30D. This TV has extremely done wonderful business across the world. Recently, Sony has done commendable job by launching LCD-LED television called Bravia KDL-55HX925.

Panasonic has also earned great applause, when it comes to televisions with plasma panels. The company is celebrating its success after designing the world's largest 3D plasma panel measuring 152-inches. The TH-P65VT30D TV has been designed in a flawless manner. The TV can be availed in a single sheet design, which is extremely classy and extravagant. This gadget is packed with a bezel, which is slightly on the thicker side. The user will find the control buttons at the side on the back. These buttons comprise of options for controlling settings such as brightness, contrast, color, volume, etc. Moreover, there is an up and down arrow button, which helps in the adjustment of these settings along with buttons for switching between TV and AV modes. The location of these controls is very suitable as one can easily adjust the settings while viewing the television at the same time. The features and performance of this TV helps in climbing great ladders of success.

TH-P65VT30D TV comes with dynamic contrast ratio of 5,000,000:1 and moving picture resolution of 1080 lines. You will be amazed to find that the gadget is equipped with 24p Smooth Film/Playback of 24p Smooth Film. The picture mode of this TV includes Dynamic, Normal, Cinema, Game, True Cinema and Photo. It has a screen size of 50 inch (127 cm) Plasma and a resolution of 1,920 x 1,080. Equipped with 2 x 10 watt 2 Speakers, the TV has a sound mode of music, speech and user. Furthermore, the device is also outfitted with HDMI Input of 4 (1 Side, 3 rear)/ Audio Return Channel (Input 2). The television boosts of a composite video input of AV1/2: RCA phono type (1 side, 1 rear) and component video input of RCA phono type [Y, PB/CB, and PR/CR] (1 set rear). The power consumption for this television is 425 W.

All the amazing features and performance of this television has paved the way for it to achieve grand success throughout the world. There is no doubt that the TV is little bit bulky, but the performance of this gadget will surely make you fall in love with this television. Many consumers are of the view that this is a Best Television from the Panasonic in terms of plasma panel. It is expected that Panasonic will go on earning more and more accolades with such better quality televisions.
