Few Tips About Finding the Cheapest Airline Flights

by Tracy Narvaez

Article published on March 6th 2012 | Travel

Many people understand the fact that it pays to take a trip by air than to travel by any of the other modes of transportation. This is because air travel seems to be getting cheaper than road travel especially with the looming hike in fuel prices. More so, it is easier and faster to get to distant destination points by air. Interestingly, if you know how to shop properly you can always get cheap flights.

A good point that will usually guarantee you a cheap flight is to make your booking as soon as you make the decision to travel. In fact, if you want to avoid paying exorbitant fees, avoid buying your tickets on the same day that you intend to travel. Buying your tickets early allows you to benefit from the advance booking discounts offered by airlines.

If you are interested in getting cheap tickets, you also need to consider buying your tickets for early morning or late night trips. You will usually find out that prices are slashed for such trips. It also helps you if you can choose to travel at such times on Wednesdays, Tuesdays and Saturdays. This is because the traffic is light at such periods.

Notwithstanding, when travelling at holiday periods, you will rarely get any special discount for any time of the day or any day of the week. This is because there are usually a large number of people travelling to different destinations. Your only solution is to go back to the idea of making your bookings some months in advance.

It is also easy for you to get a cheap price if you take the time to compare deals when you shop for your ticket. For instance, contacting different airlines to know how much they are selling tickets to your destination is a good idea. In addition, it helps you to make educated decisions so that you get the best value for your money.

The internet is also a great place to go if you want to buy cheap tickets. Travel agents, consolidators and even airlines have websites where you can make purchases at great prices. This is because most consolidators buy the ticket in large numbers and are able to sell off to individuals at a lower price. More so, most airlines would offer you a discount if you purchase your ticket from their website.

One other way of getting a cheap flight is for you to have some flexibility in the travel plans that you make. For instance, if you have decided to travel with a certain flight at a time of the day, you may want to find out how much the ticket for a later or an earlier flight costs. You may find out that such a flight is actually cheaper than the one you wanted to book.

More concerning being flexible, you may want to take a flight that has some stops for changeovers along the way instead of a direct non-stop flight. It is usually cheaper to take a couple of flights to reach your destination that a direct journey. Thus, if have more time and less money, you should consider this option. However, you should be clear on the timetable to that you do not miss the next flight.
