Article published on August 20th 2012 | Weddings

One of the hot trends in weddings right now is flip flops. Flips flops are great for outdoor weddings like beach weddings but they also offer comfort for the reception for indoor weddings. This article will talk about the different trends and provide some ideas for customized flip flops wedding.

If you are having and indoor wedding, you have likely selected a pair of designer high heels for your ceremony. These shoes have the ornate detail to complement your dress but may have your feet hurting by the time you are ready to dance. Many brides choose to change into more comfortable shoes for the reception. You can get customized flip flops for wedding that are made special for brides and are the same beautiful detail as your ceremony shoes. This way you can continue to feel beautiful and also be comfortable throughout the reception.

Brides are beginning to realize that many of their guests may start to have aching feet by the reception as well. A great idea is to provide a bin of flip flops at the reception for them to change into for the dancing. This is also a good idea for a beach wedding. You guests may not have been prepared for walking in the sand so you can provide them with a pair of flips flops. This is a very unique touch that your guests will very much appreciate.

If you are having a beach wedding or outdoor wedding you may be looking for flip flops for beach wedding. This is a very smart idea, as you don't want to have any trouble as you are walking down the aisle. Luckily, there are companies that specialize in flip flops and make beautiful bridal flip flops to keep you comfortable.

You also need to consider the comfort of your bridesmaids. On the beach they will need a shoe that will work in the sand or they may want to change their shoes for dancing as well. You can get flip flops for wedding party and include them in their bridesmaidâ€™s gift bags. You can have perfectly coordinated and stylish bridesmaids even on the beach and late into the night. They will appreciate this as a gift because they use them after the wedding as well.

Flip flops for wedding party are also great for when you are getting ready for the wedding. You can all wear them around the hotel or salon and feel pretty but not ruin your pedicures. Have coordinated flip flops will produce very pretty pictures for the "getting ready" portion of your wedding.

Flips flops are definitely a big trend in weddings as brides are realizing that comfort and function are important along with style. Fortunately, designers are taking note too and there are great options out there for wedding flip flops.
